Un progetto, di qualsiasi natura, è una sfida, una visione,  
è la volontà di creare qualcosa che prima non esisteva.

Un progetto è anche un atto di responsabilità,  
ed un processo in cui le proprie competenze  
vengono costantemente messe in gioco.

Un progetto è, per noi,  
soprattutto un'opportunità per crescere.

A project is a challenge, a vision  
and the will to create something that didn't exist before.

A project is also an act of responsibility,  
and process in which knowledge and skills are often questioned.

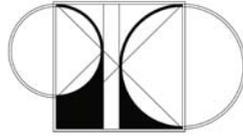

A project brings excitement, but also moments of despair and anxiety.

A project is, for us,  
especially the opportunity to grow.

I nostri progetti puntano a generare emozioni.  
Cerchiamo di condurre il cliente in un viaggio  
fatto di esperienze visive e tattili, stimolanti e gratificanti.  
Lo spazio viene concepito al fine di poter interagire con la mente,  
il corpo ed i sensi di coloro che lo utilizzeranno.  
La casa, nella sua articolazione e composizione,  
determina la qualità della nostra esistenza.  
E' luogo di incontro, di socializzazione, di affetti,  
ma anche di silenzi e solitudini.  
E' lo scrigno della nostra vita.  
L'uomo, con il suo vivere quotidiano,  
è al centro del nostro pensiero progettuale.

Our projects try to give emotions.  
We try to lead the customer on a stimulating journey,  
made of visual and tactile experiences.  
We define the space to promote the interaction with the mind,  
the senses and the body of those who will experience it.  
Our house determines the quality of our existence.  
It is a place of meeting, socialization, affection,  
but also of silence and solitude.  
It is the sanctuary of our life.

L'esperienza ventennale maturata nell'ambito sia residenziale che commerciale, ci permette di approcciare progetti di architettura e di interior design improntati a soddisfare ogni richiesta formale ed estetica del cliente.

La curiosità e la voglia di creare progetti inediti, concepiti per un certo spazio e per un certo luogo, è la linfa vitale dalla quale traiamo l'energia creativa, che spesso ci spinge a mettere in discussione concetti tradizionali e abitudini consolidate, cercando nuove prospettive, al fine di creare soluzioni innovative ed uniche.

Le nostre competenze sono la progettazione e il design di interni, ma abbiamo un approccio multidisciplinare, anche attraverso collaborazioni professionali di lunga durata. Questo ci permette di poter gestire progetti anche molto complessi e di soddisfare le esigenze dei nostri clienti.

Our experience, both residential and commercial, allows us to develop architecture and interior design projects aimed at satisfying every formal and aesthetic request of the customer. The curiosity and desire to create new projects, adapted for a specific space and a specific place, is the lifeblood that gives us energy.

This creative energy pushes us to rethink traditional concepts and established habits, trying to create different angles, in the pursuit of better results and creations.

Our core competence is design, both architectural and interior. We have, however, a multidisciplinary approach and, through long standing partnerships, we are able to manage projects of different scale and complexity.
